Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura et al. US 3,994,842, or Shibahara US 5,002,829 or EP 0 461 464 each taken in view of either Blondelet et al. US 6,435,491 or 6,074,016.

4. Kimura et al. US 3,994,842, or Shibahara US 5,002,829 or EP 0 461 464 each show rubber compositions which can be base upon natural rubber having incorporated therein carbon black, fillers. These compositions are further disclosed as having crosslinking (vulcanizing agents) used to cure the composition, see Kimura et al. at column 2 lines 39+, Shibahara at column 3 lines 25+, and EP 0 461 464 pages 4 and 5. The difference between the claims and these teachings is that the end use of these

compositions is not specifically disclosed as a suspension spring or suspension joint comprising said suspension spring.

5. The patents to Blondelet et al. are directed to suspension spring or suspension joint comprising said suspension spring. The spring not specifically identified as being formed from the claimed rubber composition. The rubber compositions shown in the primary references are described as being used as vibration dampening articles. Given the art recognized properties possessed by vibration dampening articles it would be obvious to formulate the spring of Blondelet et al from the rubber composition of the primary references.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.
